

MARIANNE LOUISE BUAMA

Computer Science - Software
Engineering Graduate

OBJECTIVE

To seek job opportunities where I can utilize my programming and problem solving skills alongside my good communication and organizational skills to contribute to the attainment of the company's goals

EDUCATION

BS Computer Science with Specialization in Software Engineering (BSCSSE)

FEU Alabang | Muntinlupa, Philippines
Aug 2019 – Feb 2024

WORK EXPERIENCE

Full Stack Developer

Tagpros Children Inc. | Quezon City, Philippines
April 2023 – Nov 2023

- Create and code user-friendly and visually engaging websites using HTML, CSS, and JavaScript.
- Develop interactive web features, optimize performance, and ensure cross-browser compatibility.
- Collaborate with teams to translate design concepts into functional websites, troubleshoot issues, and implement updates as needed.

ACCOMPLISHED PROJECTS

- **Tagpros NRP website:** A website providing quality, high-dosage tutoring to students in public schools across the Philippines, aiming to combat the learning loss brought by the pandemic | Web Developer Intern
- **Calimlim Dental Clinic Website:** A dental website that integrates appointment booking and monitoring, patient information recording, and inventory management for enhanced convenience | Front-End Developer
- **Tagpros Proprietary Website:** A learning platform where educators create online courses based on their expertise, allowing students to enroll and enrich their knowledge in a variety of subjects | Lead Web Developer Intern
- **ISAFE:** An application that utilizes machine learning and augmented reality to predict the flood susceptibility of the barangays in Muntinlupa City and provide a 3D visualization map | Algorithm Specialist, Programmer
- **CompElec:** An online voting system website for ACM FEU Alabang Student Chapter | Programmer
- **Movie Rental System:** A console application that tracks movies in stock and customers for a video rental business | Programmer
